### ■ Teaching

I teach epidemiology and biostatistics at the University of Geneva and University of Bern to undergraduate and graduate students in medicine and biomedical sciences. I also supervise master and PhD students in medicine and health sciences on topics related to public health, primary health care, and psychiatry.

I previously taught research methodology and statistic in two Swiss universities (Geneva and Lausanne) and five French universities. I taught courses and seminars on research methodology and quantitative methods for undergraduate students in social sciences and humanities.

I also previously taught social psychology in five French universities. I taught seminars and courses for undergraduate students in psychology or applied sciences.

### ■ Teaching responsibilities
