 ORCID 0000-0002-5911-2037

I believe in questioning, looking for alternatives and improving knowledge, actions and procedures. Throughout my career trajectory, I touched different areas and worked hand-in-hand with people from the industry, academia, and regulatory bodies. I trust the benefits that a diverse and interdisciplinarity team can yield. I advocate for normalization of the female body towards better women's health. I pursue work-life balance and love hiking in the Alps.
